

Norgrove News 2021

Norgrove Training

To our valued clients and Student network

We're excited to send you the first of our regular news and views of happenings in the Health and Aged Care sector.

2021 New Beginning

The New Year brings even more opportunity in South Australia, with continued growth for jobs and even more funded training in the health sector. Health Care is still the fastest growing sector for jobs in Australia and this is expected to continue for the next 10 years.

Norgrove Training have trained over 500 students in 2020 and nearly 90% of our completed students have been employed, as evident in the 2020 NCVER Independent Study released in January 2021. This compares with a 35% average for other Training Providers in SA. We continue to show that our training is providing our students with a high standard of skills for our employers, who continue to employ a large number of our students.

In 2021 our mission is to continue our high level of training with the continuation of our Certificate III in Individual Support courses, new traineeship program as well as our existing Accredited Medications unit, First Aid and CPR. We are excited to also be adding to our training calendar and will be commencing training of the Certificate IV in Ageing Support and accredited Manual Handling. Many of these courses are funded by the South Australian Government.

We would like to also take this opportunity to thank our past and present students for the large number of referrals for new students. Likewise our employers, job active agencies and allied networks, who have supported new students for work placement and into real jobs.

All of the team at Norgrove Training look forward to seeing you and working with you in 2021.
